Zimbabwe	220-230	UK or EU

>>>> The most frequently specified plug pattern for electronic equipment in-country will appear in bold type <<<<

Modems with Third Party Approval

As for modems that hold "Third Party Approval" and can only be purchased in-country where they are to be used, Multi-Tech states the following:

"Most countries allow Multi-Tech Systems (USA) or one of our foreign subsidiaries to hold a type-approval certificate for the homologation of our modem products. However certain countries (including **Israel** and **Malaysia**) do not allow a foreign companies to hold a type-approval certificate, but do require a locally registered company to hold the type-approval. Because of these kinds of local government regulations, the only alternative for us is to have products with the type-approval, where Multi-Tech does not have a local registered office is, to work with customers who have local offices in those countries to help them get the approval in their name. In most cases, these customers are distributors of our products located in the country or certain OEM customers who have local offices in the country.

"The responsibility for using or installing a modem, which does not have the local government's type-approval, on a public telephone network in-country is not the responsibility of the manufacture; but it is the responsibility of the user or installer of the modem. Customers choosing to purchase modems not approved (without type-approval) for use on the public telephone network for any given country who then proceeds to install it or has their client install it on the public telephone network are responsible for the violation of Multi-Tech documentation 5/12/97.

In cases where the modem must be purchased in the country, CDI's solution is to purchase the UniGuard (UG-01 AES) which does not contain an internal modem.

Modems without any International Approvals

For countries where Multi-Tech has no approvals (such as Bahrain, Thailand and the United Arab Emirates) they can supply us with modems that will work in those countries, however, they will be without the country specific PTT Approvals.

Disclaimer

*** These commodities are prohibited from being used for and/or sold/resold to governments and/or government end-users end-users without prior specific licensing per the US Export Administration Regulations (EAR) §740.17 (A) and (B) 3, and §740.15.No exports are authorized to Cuba, Iran, North Korea, Sudan or Syria.*
